UNICULTURE PROJECT

UniCulture Erasmus+ project aims to develop an innovative, holistic and interactive approach for training university professors and teaching staff to conduct educational process in intercultural and cross-cultural (ICC) environments. The training kit developed within the project includes the Handbook providing theoretical background for teaching in ICC environment, the Workbook with case studies, tests and scenarios mirroring the Workbook structure and the Manual for trainers, to facilitate implementation of the UniCulture course.

Handbook and Workbook updates

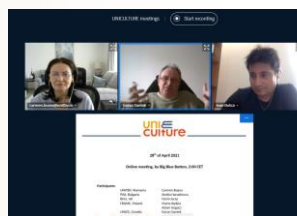

The two first outputs: the Handbook (IO2) and Workbook (IO3) are ready in English! Partners translate them into national languages.

The main aim of the Handbook is to provide the theoretical background needed for university professors and assistants to develop their personal and professional competencies and learn how to work better and more efficiently in diverse and intercultural environments.

The Workbook is complimentary to the Handbook, presenting case studies, examples, and scenarios, as well as interactive tests, quizzes, and exercises to be used for teaching, evaluation, and self-evaluation.

PROJECT MEETINGS

Although COVID-19 pandemic seems to be less severe, the partnership could not meet in person, so the partners stayed connected and focused on the project using virtual tools.
